

Bright, young talent invited

Apply today to be part of a green, innovative sector.

The Paper Manufacturers Association of South Africa (PAMSA) is calling for applications from BEng/BSc in Chemical Engineering final-year students and graduates for its Master's in Engineering Bursary and Research Programme.

MASTER'S IN ENGINEERING BURSARY AND RESEARCH PROGRAMME

Opportunity to work in an exciting sector that focuses on the circular economy, innovation and sustainability.

Total value of bursary over two years: R320 000. This covers two years of full-time study at participating universities.

Students will work on projects relating to process research. Topics range from the beneficiation of wood fibre, recycled fibre or process waste; energy or water efficiency; biofuels, etc.

Participation in the programme facilitates possible employment as an engineer-in-training at participating PAMSA member companies.

CRITERIA FOR APPLICATION

Only students who meet the following requirements should apply:

- You must be a **final-year BEng/BSc Chemical Engineering student** at a registered South African university or a **BEng/BSc Chemical Engineering graduate**.
- You must have a **good academic record** with a **minimum 60% average** in the final year of study.
- You must have completed your studies in **five years or less**.
- South African citizenship is an advantage.
- You will be required to **submit a CV** and **academic transcripts** for all years of study, as well as **letters of reference and motivation**.

Interviews will only be held with selected candidates. Terms and conditions apply.
